

November 3, 2009

Mr. Victor Ketellapper
US Environmental Protection Agency
501 Mineral Avenue
Libby, Montana 59923

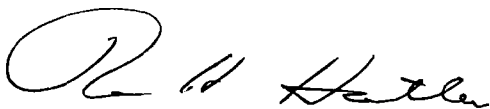

Dear Mr. Ketellapper,

This letter is a follow up to our phone conversation of October 8, 2009 in regards to my lots 7, 8 & 9 on the Libby Cabinet View Golf course. As I stated in my phone message to you, I was concerned about the presence of vermiculite on my lots and asked if the soil sampling conducted in 2007 at the golf course included my lots.

You indicated that soil testing had not occurred on my lots but you indicated that you would see that soil sampling would be conducted on them this spring. Per our conversation you were to confirm this in writing. Since I have yet to hear from you, this is a follow up letter.

Please confirm that soil sampling will indeed take place as you indicated.

Thank you,

Roe H. Hatlen
